

IT Staffing Solutions

MAR understands that capable and knowledgeable IT professionals are essential to any company in the present business environment of burgeoning technological growth. That is why we employ only the most certified and experienced IT and technical personnel that can help our clients achieve their goals, whether long-term or short-term. Our staff ranges from junior level to senior level, and all hold active security clearance. Additionally, we provide the necessary HR, Accounting, Contracts, and Security support for all these individuals.

MAR has also developed strategic relationships with large businesses such as Lockheed Martin, BAE Systems, Raytheon, SAIC, and more to supplement our team. Whether our customer is a small startup or a large enterprise, we are committed to making sure that they receive the proper technical resources that their business requires.

An example of our past performance in this area include:

Pension Benefit Guaranty Corporation (PBGC), Help Desk Support

MAR provides Level I and Level II staffing support to the PBGC, a federal corporation that protects the pensions of nearly 44 million American workers and retirees. Our well-trained team members assist the help desk staff with the creation and modification of applications and

Active Directory User Accounts, as well as enforcing PBGC's network security requirements. Other services include providing top-notch customer service care, troubleshooting and resolving any and all problems with User Accounts or applications, and coordinating all processes and paperwork with Federal Managers and Application Owners. Our reliable staff consistently meets the service level agreement (SLA) for response

times to telephone and email inquiries, and one team member was recently promoted to Team Lead by the PBGC prime contractor for his exemplary performance in team leadership.
